Work Completed
26AUG2024 1 Hour Travel + 3 Hours Labor System was on, but displaying false FID output. The GCFID was turned off and temperatures were allowed to cool off before troubleshooting. The front FID was removed and re-seated. Then, the system was restarted and the output signal for the front FID was now displaying real data. The customer ran a couple blanks and a standard, and confirmed functionality. The system was returned to production, and customer was satisfied with results.

The above works have been supplied and installed to my complete satisfaction.
