NRC is a charter member of the AAPOR Transparency Initiative, providing clear disclosure of our sound and ethical survey research practices.

About The NCS™

The National Community Survey™ (The NCS™) report is about the “livability” of Scottsdale. The phrase “livable community” is used here to evoke a place that is not simply habitable, but that is desirable. It is not only where people do live, but where they want to live.

Great communities are partnerships of the government, private sector, community-based organizations and residents, all geographically connected. The NCS captures residents’ opinions considering ten central facets of a community:

- Economy
- Mobility
- Community Design
- Utilities
- Safety
- Natural Environment
- Parks and Recreation
- Health and Wellness
- Education, Arts and Culture
- Inclusivity and Engagement

The Community Livability Report provides the opinions of a representative sample of 328 residents of the City of Scottsdale. The margin of error around any reported percentage is 5% for all respondents and the response rate for the 2020 survey was 21%. The full description of methods used to garner these opinions can be found in the *Technical Appendices* provided under separate cover.

Overview of Results

Residents continue to experience a high quality of life with sense of community on the rise

As in 2018, nearly all survey respondents reported their overall quality of life and Scottsdale as a place to live as excellent or good; a similar percentage offered these high ratings to the overall image or reputation of Scottsdale. Further, nearly all residents reported that they were likely to remain in Scottsdale for the next five years and were likely recommend living in Scottsdale. All aforementioned ratings were higher than those found in comparison communities. About two-thirds of survey respondents offered positive evaluations to the sense of community in Scottsdale, a rating which increased in 2020 compared to 2018.

Most residents appreciate their local governance and leadership and offer high evaluations to the value of services for taxes paid

A majority of residents offered positive evaluations to the various listed aspects of Scottsdale's local governance and leadership with as many as 8 in 10 positively rating the overall customer service of Scottsdale employees, quality of services provided by the City and public information services. While ratings were generally similar to the national averages, the rating for the value of services for the taxes paid to Scottsdale not only eclipsed the national average but also improved since 2018.

While economic outlook declined since 2018, ratings of the local economy remain strong

Nearly all aspects of community livability and services related to the economy were rated positively by at least a majority of residents and were rated higher than the national comparisons. The top-rated aspects had more than 9 in 10 residents offering positive ratings including Scottsdale as a place to visit and as a place to work, shopping opportunities and the overall quality of business and service establishments. Further, the rating for the overall quality of business and service establishments increased in 2020 compared to 2018. However, residents were feeling less optimistic as fewer residents in 2020 compared to 2018 reported feeling that the economy would have a positive impact on their household income.

Affordability in Scottsdale could be a focus area

While aspects related to affordability in the community tend to be rated similarly to the national averages, they tended to be the lowest rated among all listed survey ratings. About 3 in 10 Scottsdale residents offered a positive rating to the availability of affordable quality housing, and fewer than half gave positive marks to the cost of living. About 6 in 10 gave positive marks to the availability of affordable quality childcare/preschool. This could be a potential area of focus.

Facets of Livability

Ratings of importance were compared to ratings of quality to help guide City staff and officials with decisions on future resource allocation and strategic planning areas. When competition for limited resources demands that efficiencies or cutbacks be instituted, it is wise not only to know what facets are deemed most important to residents' quality of life, but which among the most important are perceived to be of relatively lower quality in your community. It is these facets of community livability – more important facets perceived as being of lower quality – to which attention needs to be paid first.

About the Demographic Comparisons

The National Community Survey™ (The NCS™) is a collaborative effort between National Research Center, Inc. (NRC) and the International City/County Management Association (ICMA). The survey and its administration are standardized to assure high quality research methods and directly comparable results across The NCS communities. Communities conducting The NCS can choose from a number of optional services to customize the reporting of survey results. Scottsdale's Comparisons by Demographic Subgroups is part of a larger project for the City and additional reports are available under separate cover. This report discusses differences in opinion of survey respondents by age, sex, housing tenure, housing unit type and race and ethnicity.

The National Community Survey™

The NCS™ is presented by NRC in collaboration with ICMA.

NRC is a charter member of the AAPOR Transparency Initiative, providing clear disclosure of our sound and ethical survey research practices.

Understanding the Tables

For most of the questions, one number appears for each question. Responses have been summarized to show only the proportion of respondents giving a certain answer; for example, the percent of respondents who rated the quality of life as “excellent” or “good,” or the percent of respondents who participated in an activity at least once. It should be noted that when a table that does include all responses (not a single number) for a question that only permitted a single response does not total to exactly 100%, it is due to the common practice of percentages being rounded to the nearest whole number.

The subgroup comparison tables contain the crosstabulations of survey questions by selected respondent characteristics. Chi-square or ANOVA tests of significance were applied to these breakdowns of survey questions. A “p-value” of 0.05 or less indicates that there is less than a 5% probability that differences observed between groups are due to chance; or in other words, a greater than 95% probability that the differences observed in the selected categories of the sample represent “real” differences among those populations. As subgroups vary in size and each group (and each comparison to another group) has a unique margin of error, statistical testing is used to determine whether differences between subgroups are statistically significant.

Each column in the following tables is labeled with a letter for each subgroup being compared. The “Overall” column, which shows the ratings for all respondents, also has a column designation of “(A)”, but no statistical tests were done for the overall rating.

For each pair of subgroups ratings within a row (a single question item) that has a statistically significant difference, an uppercase letter denoting significance is shown in the cell with the larger column proportion. The letter denotes the subgroup with the smaller column proportion from which it is statistically different. Subgroups that have no uppercase letter denotation in their column and that are also not referred to in any other column were not statistically different.

For example, in Table 1 on the following page, respondents who rent their home (A) gave significantly lower ratings to the overall quality of life than those who own their home (B), as denoted by the “A” listed in the cell of the ratings for those who own their home.

The National Community Survey™ - Demographic Subgroup Report

About the Geographic Comparisons

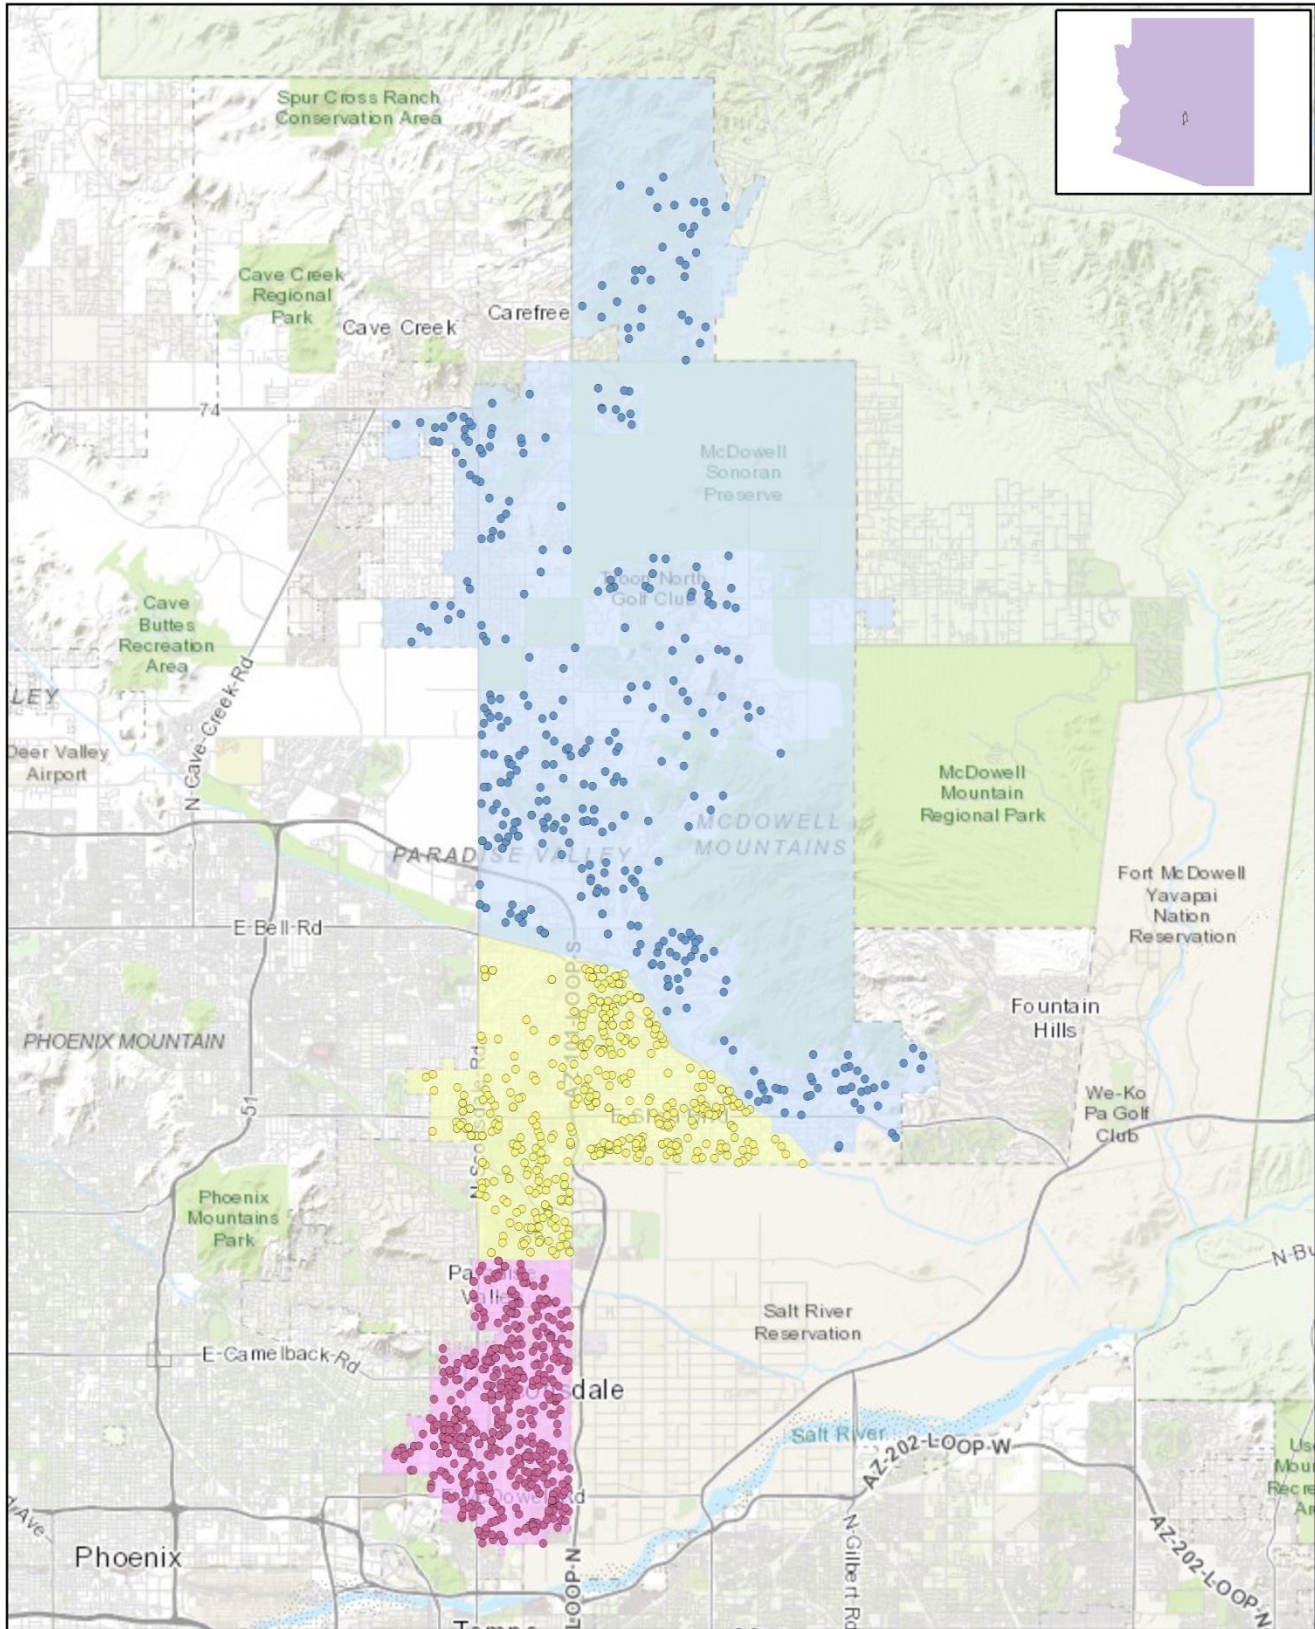

The National Community Survey™ (The NCS™) is a collaborative effort between National Research Center, Inc. (NRC) and the International City/County Management Association (ICMA). The survey and its administration are standardized to assure high quality research methods and directly comparable results across The NCS communities. Communities conducting The NCS can choose from a number of optional services to customize the reporting of survey results. Scottsdale's Comparisons by Geographic Subgroups is part of a larger project for the City and additional reports are available under separate cover. This report discusses differences in opinion of survey respondents by geographic subarea (South of Indian Bend Road, North of Indian Bend Road and South or West of CAP Canal, and North or East of CAP Canal).

The three subareas listed above were tracked for comparison and the number of completed surveys for each are in the figure below.

FIGURE 1: GEOGRAPHIC AREAS

Region	Number of Completed Surveys
South of Indian Bend Road	115
North of Indian Bend Road and South or West of CAP Canal	114
North or East of CAP Canal	100

FIGURE 2: LOCATION OF SURVEY RECIPIENTS

Understanding the Tables

For most of the questions, one number appears for each question. Responses have been summarized to show only the proportion of respondents giving a certain answer; for example, the percent of respondents who rated the quality of life as “excellent” or “good,” or the percent of respondents who participated in an activity at least once. It should be noted that when a table that does include all responses (not a single number) for a question that only permitted a single response does not total to exactly 100%, it is due to the common practice of percentages being rounded to the nearest whole number.

The subgroup comparison tables contain the crosstabulations of survey questions by geographic subarea. Chi-square or ANOVA tests of significance were applied to these breakdowns of survey questions. A “p-value” of 0.05 or less indicates that there is less than a 5% probability that differences observed between groups are due to chance; or in other words, a greater than 95% probability that the differences observed in the selected categories of the sample represent “real” differences among those populations. As subgroups vary in size and each group (and each comparison to another group) has a unique margin of error, statistical testing is used to determine whether differences between subgroups are statistically significant.

Each column in the following tables is labeled with a letter for each subgroup being compared. The “Overall” column, which shows the ratings for all respondents, also has a column designation of “(A)”, but no statistical tests were done for the overall rating.

For each pair of subgroup ratings within a row (a single question item) that has a statistically significant difference, an uppercase letter denoting significance is shown in the cell with the larger column proportion. The letter denotes the subgroup with the smaller column proportion from which it is statistically different. Subgroups that have no uppercase letter denotation in their column and that are also not referred to in any other column were not statistically different.

For example, in Table 1 on the following page, respondents who lived South of Indian Bend Road (A) gave significantly lower ratings to overall quality of life than respondents who lived North or East of CAP Canal (C), as denoted by the “A ” listed in the cell of the rating for those who lived North or East of CAP Canal.

TABLE 1: QUALITY OF LIFE

Percent rating positively (e.g., excellent/good, very/somewhat likely)	Region			Overall (A)
	South of Indian Bend Road	North of Indian Bend Road and South or West of CAP Canal	North or East of CAP Canal

About Trends Over Time

The National Community Survey™ (The NCS™) is a collaborative effort between National Research Center, Inc. (NRC) and the International City/County Management Association (ICMA). The survey and its administration are standardized to assure high quality research methods and directly comparable results across The NCS communities. The NCS captures residents' opinions considering ten central facets of a community:

- Economy
- Mobility
- Community Design
- Utilities
- Safety
- Natural Environment
- Parks and Recreation
- Health and Wellness
- Education, Arts and Culture
- Inclusivity and Engagement

This report discusses trends over time, comparing the 2020 ratings for the City of Scottsdale to its previous survey results in 2003, 2004, 2006, 2010, 2013, 2016 and 2018. Additional reports and technical appendices are available under separate cover.

The National Community Survey™

The NCS™ is presented by NRC in collaboration with ICMA.

NRC is a charter member of the AAPOR Transparency Initiative, providing clear disclosure of our sound and ethical survey research practices.

Understanding the Tables

Trend data for Scottsdale represent important comparison data and should be examined for improvements or declines¹. Deviations from stable trends over time, especially, represent opportunities for understanding how local policies, programs or public information may have affected residents' opinions.

Meaningful differences between survey years have been noted within the following tables as being "higher" or "lower" if the differences are greater than eight percentage points between the 2018 and 2020 surveys, otherwise the comparisons between 2018 and 2020 are noted as being "similar." Additionally, the benchmark comparisons for the current survey results are presented for reference.

Overall, ratings in Scottsdale for 2020 generally remained stable. Of the 116 items for which comparisons were available, 93 items were rated similarly in 2018 and 2020, eight items showed a decrease in ratings and 15 showed an increase in ratings. Notable trends over time included the following:

- While the overall quality of the transportation system in Scottsdale decreased in 2020 compared to 2018 along with the rate of carpooling, the quality of street lighting, traffic flow and ease of travel by car increased.
- While fewer residents in 2020 compared to 2018 reported campaigning or advocating for an issue, cause or candidate, more reported voting in their most recent local election.
- Residents felt more positive about the overall quality of business and service establishments in Scottsdale in 2020 compared to 2018, but felt less positive about the impact of the economy on their household income.
- Ratings of various services were on the rise in 2020 compared to 2018 including drinking water, sewer services, storm water management and land use, planning and zoning.

¹ In 2020, The NCS survey was updated to include new and refreshed items. Consequently, some of the trends may be impacted due to wording modifications that could have potentially altered the meaning of the item for the respondent.

Access the internet from your home using a computer, laptop or tablet computer	NA	NA	NA	NA	NA	NA	NA	93%	NA	Similar
Access the internet from your cell phone	NA	NA	NA	NA	NA	NA	NA	92%	NA	Similar
Visit social media sites such as Facebook, Twitter, WhatsApp, etc.	NA	NA	NA	NA	NA	NA	NA	69%	NA	Lower
Use or check email	NA	NA	NA	NA	NA	NA	NA	97%	NA	Similar
Share your opinions online	NA	NA	NA	NA	NA	NA	NA	27%	NA	Similar
Shop online	NA	NA	NA	NA	NA	NA	NA	69%	NA	Higher

Table 14: Focus Areas

Focus Areas Percent rating each as "essential" or "very important"	2003	2004	2006	2010	2013	2016	2018	2020	2020 rating compared to 2018	Comparison to benchmark
Overall economic health of Scottsdale	NA	NA	NA	NA	NA	95%	92%	94%	Similar	Higher
Overall quality of the transportation system in Scottsdale	NA	NA	NA	NA	NA	85%	91%	74%	Lower	Similar
Overall design or layout of Scottsdale's residential and commercial areas	NA	NA	NA	NA	NA	87%	86%	79%	Similar	Similar
Overall quality of the utility infrastructure in Scottsdale	NA	NA	NA	NA	NA	NA	NA	91%	NA	Higher
Overall feeling of safety in Scottsdale	NA	NA	NA	NA	NA	94%	95%	93%	Similar	Similar
Overall quality of natural environment in Scottsdale	NA	NA	NA	NA	NA	90%	89%	89%	Similar	Higher
Overall quality of parks and recreation opportunities	NA	NA	NA	NA	NA	NA	NA	87%	NA	Similar
Overall health and wellness opportunities in Scottsdale	NA	NA	NA	NA	NA	81%	81%	83%	Similar	Higher
Overall opportunities for education, culture, and the arts	NA	NA	NA	NA	NA	77%	84%	75%	Lower	Similar
Residents' connection and engagement with their community	NA	NA	NA	NA	NA	79%	85%	69%	Lower	Lower

Prior to 2020, “Overall quality of the transportation system” was “Overall ease of getting to the places you usually have to visit.” Differences in ratings may be at least partially attributable to changes in question wording and should be interpreted cautiously.

Appendix A: Complete Survey Responses

The following pages contain a complete set of responses to each question on the survey. For questions that included a “don’t know” response option, two tables for that question are provided: the first that excludes the “don’t know” responses, and the second that includes those responses. The percent of respondents giving a particular response is shown followed by the number of respondents (denoted with “N=”).

Table 1: Question 1 without "don't know" responses

Please rate each of the following aspects of quality of life in Scottsdale.	Excellent		Good		Fair		Poor		Total

What is your gender?	Percent	Number
Female	57%	N=186
Male	43%	N=142
Identify in another way	0%	N=0
Total	100%	N=328

Appendix B: Benchmark Comparisons

Comparison Data

NRC’s database of comparative resident opinion is comprised of resident perspectives gathered in surveys from over 600 communities whose residents evaluated the same kinds of topics on The National Community Survey. The comparison evaluations are from the most recent survey completed in each community; most communities conduct surveys every year or in alternating years. NRC adds the latest results quickly upon survey completion, keeping the benchmark data fresh and relevant. The communities in the database represent a wide geographic and population range. The City of Scottsdale chose to have comparisons made to the entire database.

Interpreting the Results

Ratings are compared when there are at least five communities in which a similar question was asked. Where comparisons are available, four columns are provided in the table. The first column is Scottsdale’s “percent positive.” The percent positive is the combination of the top two most positive response options (i.e., “excellent” and “good,” “very safe” and “somewhat safe,” etc.), or, in the case of resident behaviors/participation, the percent positive represents the proportion of respondents indicating “yes” or participating in an activity at least once a month. The second column is the rank assigned to Scottsdale’s rating among communities where a similar question was asked. The third column is the number of communities that asked a similar question. The final column shows the comparison of Scottsdale’s rating to the benchmark.

In that final column, Scottsdale’s results are noted as being “higher” than the benchmark, “lower” than the benchmark or “similar” to the benchmark, meaning that the average rating given by Scottsdale residents is statistically similar to or different (greater or lesser) than the benchmark. Being rated as “higher” or “lower” than the benchmark means that Scottsdale’s average rating for a particular item was more than 10 points different than the benchmark. If a rating was “much higher” or “much lower,” then Scottsdale’s average rating was more than 20 points different when compared to the benchmark.

Benchmark Database Characteristics	
Region	Percent
New England	3%
Middle Atlantic	5%
East North Central	15%
West North Central	13%
South Atlantic	22%
East South Central	3%
West South Central	7%
Mountain	16%
Pacific	16%
Population	Percent
Less than 10,000	10%
10,000 to 24,999	22%
25,000 to 49,999	23%
50,000 to 99,999	22%
100,000 or more	23%

National Benchmark Comparisons

Table 43: Quality of Life

Quality of Life Items	Percent positive	Rank	Number of communities in comparison	Comparison to benchmark

Appendix C: Detailed Survey Methods

The National Community Survey™ (The NCS™), conducted by National Research Center, Inc., was developed to provide communities an accurate, affordable and easy way to assess and interpret resident opinion about important local topics. Standardization of common questions and survey methods provide the rigor to assure valid results, and each community has enough flexibility to construct a customized version of The NCS.

Results offer insight into residents' perspectives about the community as a whole, including local amenities, services, public trust, resident participation and other aspects of the community in order to support budgeting, land use and strategic planning and communication with residents. Resident demographic characteristics permit comparison to the Census as well as comparison of results for different subgroups of residents. The City of Scottsdale funded this research. Please contact Brent Stockwell of the City of Scottsdale at BStockwell@scottsdaleaz.gov if you have any questions about the survey.

Survey Validity

The question of survey validity has two parts: 1) how can a community be confident that the results from those who completed the questionnaire are representative of the results that would have been obtained had the survey been administered to the entire population? and 2) how closely do the perspectives recorded on the survey reflect what residents really believe or do?

To answer the first question, the best survey research practices were used for the resources spent to ensure that the results from the survey respondents reflect the opinions of residents in the entire community. These practices include:

- Using a mail-out/mail-back methodology, which typically gets a higher response rate than phone for the same dollars spent. A higher response rate lessens the worry that those who did not respond are different than those who did respond.
- Selecting households at random within the community to receive the survey to ensure that the households selected to receive the survey are representative of the larger community.
- Over-sampling multi-family housing units to improve response from hard-to-reach, lower income or younger apartment dwellers.
- Selecting the respondent within the household using an unbiased sampling procedure; in this case, the "birthday method." The cover letter included an instruction requesting that the respondent in the household be the adult (18 years old or older) who most recently had a birthday, irrespective of year of birth.
- Contacting potential respondents three times to encourage response from people who may have different opinions or habits than those who would respond with only a single prompt.
- Inviting response in a compelling manner (using appropriate letterhead/logos and a signature of a visible leader) to appeal to recipients' sense of civic responsibility.
- Providing a pre-addressed, postage-paid return envelope.
- Offering the survey in Spanish or other language when requested by a given community.
- Weighting the results to reflect the demographics of the population.

The answer to the second question about how closely the perspectives recorded on the survey reflect what residents really believe or do is more complex. Resident responses to surveys are influenced by a variety of factors. For questions about service quality, residents' expectations for service quality play a role as well as the "objective" quality of the service provided, the way the resident perceives the entire community (that is, the context in which the service is provided), the scale on which the resident is asked to record his or her opinion and, of course, the opinion, itself, that a resident holds about the service. Similarly a resident's report of certain behaviors is colored by what he or she believes is the socially desirable response (e.g., reporting tolerant behaviors toward "oppressed groups," likelihood of voting for a tax increase for services to poor people, use of alternative modes of travel to work besides the single occupancy vehicle), his or her memory of the actual behavior (if it is not a question speculating about future actions, like a vote), his or her confidence that he or she can be honest without suffering any negative consequences (thus the need for anonymity) as well as the actual behavior itself.

How closely survey results come to recording the way a person really feels or behaves often is measured by the coincidence of reported behavior with observed current behavior (e.g., driving habits), reported intentions to behave with observed future behavior (e.g., voting choices) or reported opinions about current community quality with objective characteristics of the community (e.g., feelings of safety correlated with rates of crime). There is a body of scientific literature that has investigated the relationship between reported behaviors and actual behaviors. Well-conducted surveys, by and large, do capture true respondent behaviors or intentions to act with great accuracy. Predictions of voting outcomes tend to be quite accurate using survey research, as do reported behaviors that are not about highly sensitive issues (e.g., family abuse or other illegal or morally sanctioned activities). For self-reports about highly sensitive issues, statistical adjustments can be made to correct for the respondents' tendency to report what they think the "correct" response should be.

Research on the correlation of resident opinion about service quality and "objective" ratings of service quality vary, with some showing stronger relationships than others. NRC's own research has demonstrated that residents who report the lowest ratings of street repair live in communities with objectively worse street conditions than those who report high ratings of street repair (based on road quality, delay in street repair, number of road repair employees). Similarly, the lowest rated fire services appear to be "objectively" worse than the highest rated fire services (expenditures per capita, response time, "professional" status of firefighters, breadth of services and training provided). Resident opinion commonly reflects objective performance data but is an important measure on its own. NRC principals have written, "If you collect trash three times a day but residents think that your trash haul is lousy, you still have a problem."

Selecting Survey Recipients

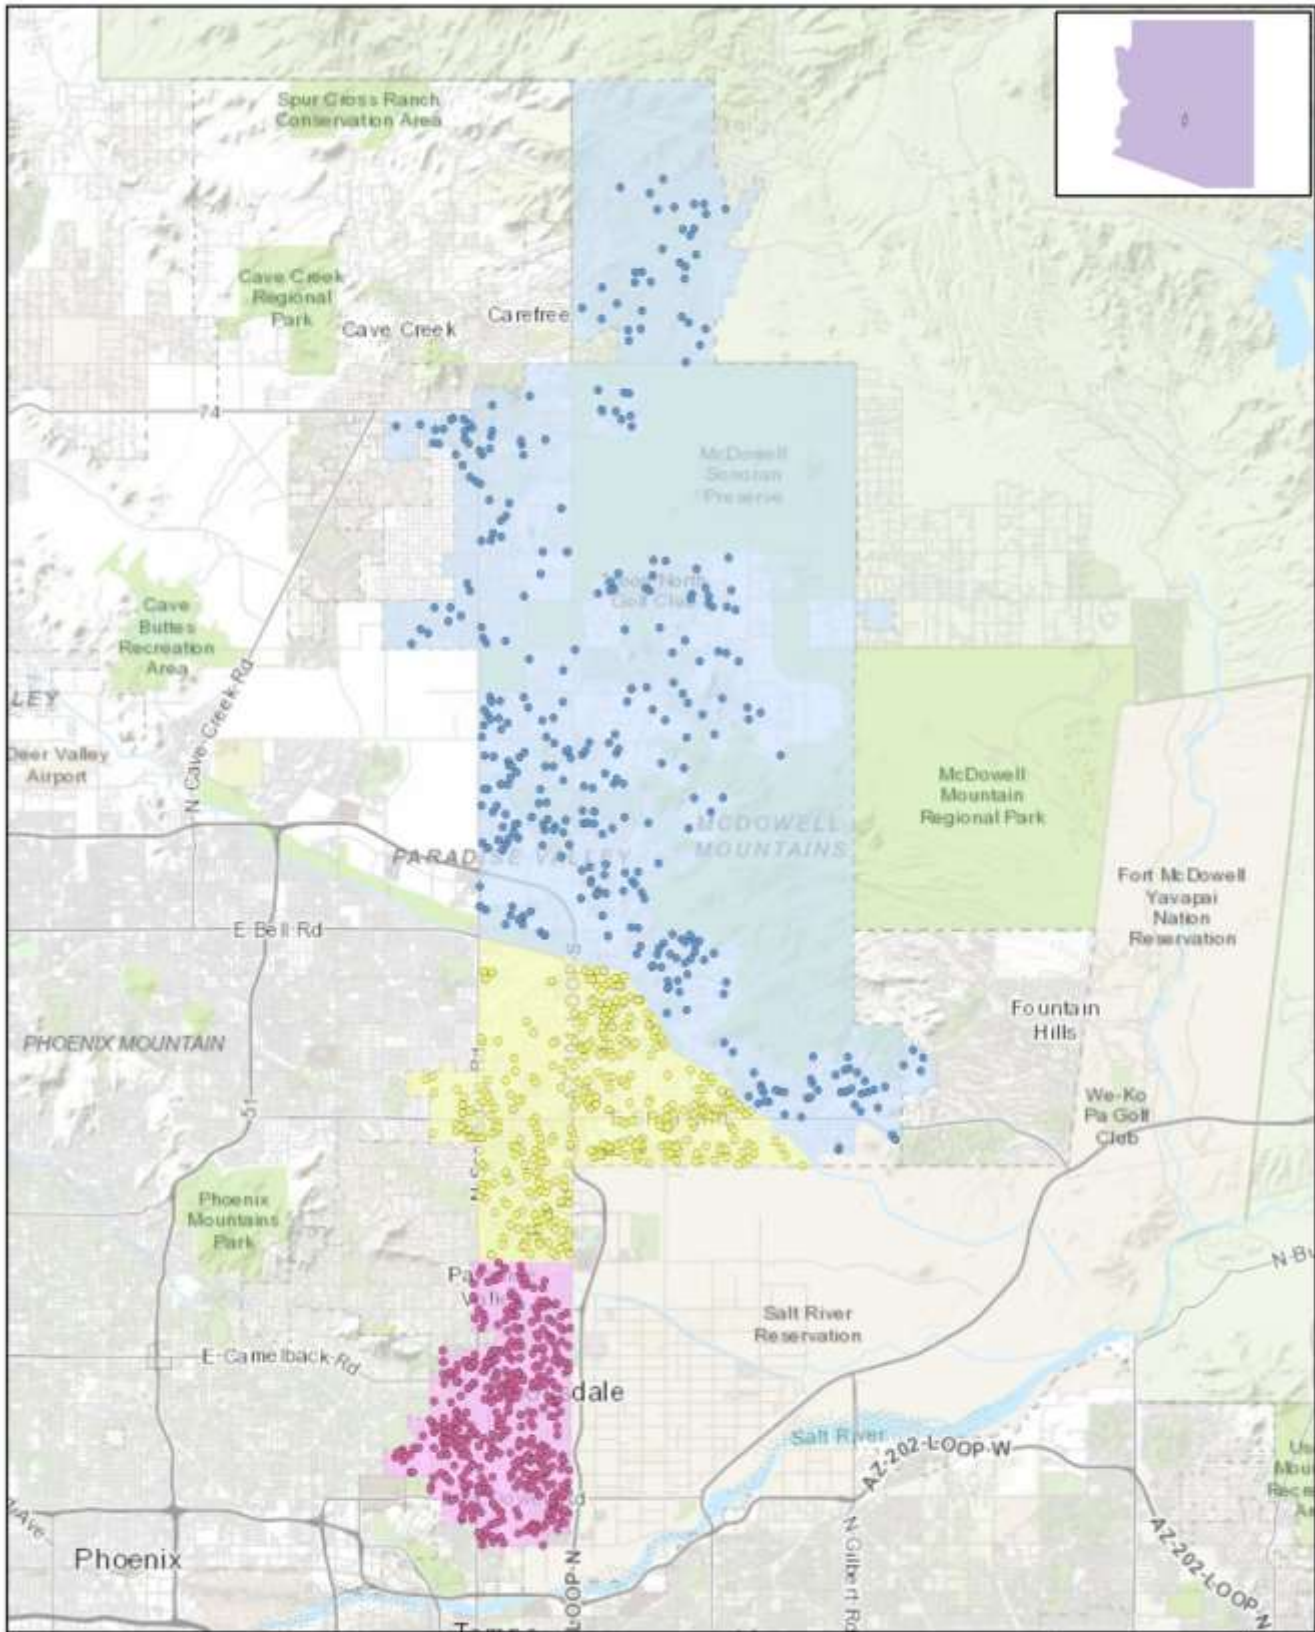

"Sampling" refers to the method by which households were chosen to receive the survey. All households within the City of Scottsdale were eligible to participate in the survey. A list of all households within the zip codes serving Scottsdale was purchased from Go-Dog Direct based on updated listings from the United States Postal Service. Since some of the zip codes that serve the City of Scottsdale households may also serve addresses that lie outside of the community, the exact geographic location of each housing unit was compared to community boundaries using the most current municipal boundary file (updated on a quarterly basis) and addresses located outside of the City of Scottsdale boundaries were removed from consideration. Each address

identified as being within City boundaries was further identified as being within one of the three geographic subareas.

To choose the 1,700 survey recipients, a systematic sampling method was applied to the list of households previously screened for geographic location. Systematic sampling is a procedure whereby a complete list of all possible households is culled, selecting every *Nth* one, giving each eligible household a known probability of selection, until the appropriate number of households is selected. Multi-family housing units were selected at a higher rate as residents of this type of housing typically respond at lower rates to surveys than do those in single-family housing units. Figure 1 displays a map of the households selected to receive the survey. In general, because of the random sampling techniques used, the displayed sampling density will closely mirror the overall housing unit density (which may be different from the population density). While the theory of probability assumes no bias in selection, there may be some minor variations in practice (meaning, an area with only 15% of the housing units might be selected at an actual rate that is slightly above or below that).

An individual within each household was selected using the birthday method. The birthday method selects a person within the household by asking the “person whose birthday has most recently passed” to complete the questionnaire. The underlying assumption in this method is that day of birth has no relationship to the way people respond to surveys. This instruction was contained in the cover letter accompanying the questionnaire.

Survey Administration and Response

Selected households received three mailings, one week apart, beginning on November 24, 2020. The first mailing was a prenotification postcard announcing the upcoming survey. The next mailing contained a letter from the Mayor inviting the household to participate, a questionnaire and a postage-paid return envelope. The final mailing contained a reminder letter, another survey and a postage-paid return envelope. The second cover letter asked those who had not completed the survey to do so and those who had already done so to refrain from turning in another survey. The survey was available in English. The prenotification postcard and both cover letters included a URL through which the residents selected for the mail survey could choose respond online rather than by mail. The City of Scottsdale chose to augment their administration of The NCS with several additional services, including demographic subgroup comparisons and geographic subgroup comparisons. The results of these additional services have been provided under separate cover. Completed surveys were collected over the following seven weeks.

About 9% of the 1,700 surveys mailed were returned because the housing unit was vacant or the postal service was unable to deliver the survey as addressed. Of the remaining 1,549 households that received the survey, 328 completed the survey, providing an overall response rate of 21%. Of the 328 completed surveys, 157 were completed online. Additionally, responses were tracked by geographic subarea; response rates by geographic subarea ranged from 18% to 25%. The response rates were calculated using AAPOR's response rate #2¹ for mailed surveys of unnamed persons.

Table 57: Survey Response Rates by Area

	South of Indian Bend Road	North of Indian Bend Road and South or West of CAP Canal	North or East of CAP Canal	Overall
Total sample used	700	564	436	1,700
I=Complete Interviews	114	112	99	325
P=Partial Interviews	1	1	1	3
R=Refusal and break off	0	1	0	1
NC=Non Contact	0	0	0	0
O=Other	0	0	0	0
UH=Unknown household	0	0	0	0
UO=Unknown other	532	395	293	1,220
NE=Not eligible	53	55	43	151
Response rate: $(I+P)/(I+P) + (R+NC+O) + (UH+UO)$	18%	22%	25%	21%

Confidence Intervals

It is customary to describe the precision of estimates made from surveys by a “level of confidence” and accompanying “confidence interval” (or margin of error). A traditional level of confidence, and the one used here, is 95%. The 95% confidence interval can be any size and quantifies the sampling error or imprecision of the survey results because some residents’ opinions are relied on to estimate all residents’ opinions.²

The margin of error for the City of Scottsdale survey is no greater than plus or minus five percentage points around any given percent reported for all respondents (329 completed surveys).

For subgroups of responses, the margin of error increases because the number of respondents for the subgroup is smaller.

Survey Processing (Data Entry)

Upon receipt, completed surveys were assigned a unique identification number. Additionally, each survey was reviewed and “cleaned” as necessary. For example, a question may have asked a respondent to pick two items out of a list of five, but the respondent checked three; in this case, NRC would use protocols to randomly choose two of the three selected items for inclusion in the dataset.

All surveys then were entered twice into an electronic dataset; any discrepancies were resolved in comparison to the original survey form. Range checks as well as other forms of quality control were also performed.

NRC uses Polco, an online public engagement tool designed primarily for local governments, to collect online survey data. The Polco platform includes many features of online survey tools, but also includes elements tailored to the civic environment. For example, like NRC’s mailed surveys, surveys on Polco are presented with the City name, logo (or other image) and a description, so residents understand who is asking for input and why. Optionally, Polco can also verify respondents with local public data to ensure respondents are residents or voters. More generally, an advantage of online programming and data gathering is that it allows for more rigid control of the data format, making extensive data cleaning unnecessary.

² A 95% confidence interval indicates that for every 100 random samples of this many residents, 95 of the confidence intervals created will include the “true” population response. This theory is applied in practice to mean that the “true” perspective of the target population lies within the confidence interval created for a single survey. For example, if 75% of residents rate a service as “excellent” or “good,” then the 4% margin of error (for the 95% confidence interval) indicates that the range of likely responses for the entire community is between 71% and 79%. This source of uncertainty is called sampling error. In addition to sampling error, other sources of error may affect any survey, including the non-response of residents with opinions different from survey responders. Though standardized on The NCS, on other surveys, differences in question wording, order, translation and data entry, as examples, can lead to somewhat varying results.

Survey Data Weighting

The demographic characteristics of the survey respondents were compared to those found in the 2010 Census and American Community Survey estimates for adults in the City of Scottsdale. The primary objective of weighting survey data is to make the survey respondents reflective of the larger population of the community. The characteristics used for weighting were age, gender, housing type, housing tenure (rent or own), race, ethnicity and geographic subarea. No adjustments were made for design effects. The results of the weighting scheme are presented in the following table.

Table 58: Scottsdale, AZ 2020 Weighting Table

Characteristic	Population Norm	Unweighted Data	Weighted Data
Housing			
Rent home	34%	12%	32%
Own home	66%	88%	68%
Detached unit	58%	63%	61%
Attached unit	42%	37%	39%
Race and Ethnicity			
White	91%	92%	91%
Not white	9%	8%	9%
Not Hispanic	93%	97%	92%
Hispanic	7%	3%	8%
Sex and Age			
Female	52%	53%	57%
Male	48%	47%	43%
18-34 years of age	23%	4%	16%
35-54 years of age	35%	21%	35%
55+ years of age	42%	76%	50%
Females 18-34	11%	3%	12%
Females 35-54	18%	10%	18%
Females 55+	23%	40%	26%
Males 18-34	12%	1%	3%
Males 35-54	17%	10%	17%
Males 55+	19%	36%	23%
Geographic Area			
South of Indian Bend Road	37%	35%	31%
North of Indian Bend Road and South or West of CAP Canal	32%	34%	36%
North or East of CAP Canal	30%	30%	33%

* U.S. Census Bureau ACS 2017 5-year estimates

Survey Data Analysis and Reporting

The survey dataset was analyzed using the Statistical Package for the Social Sciences (SPSS). For the most part, the percentages presented in the reports represent the “percent positive.” The percent positive is the combination of the top two most positive response options (i.e., “excellent” and “good,” “very safe” and “somewhat safe,” “essential” and “very important,” etc.), or, in the case of resident behaviors/participation, the percent positive represents the proportion of respondents indicating “yes” or participating in an activity at least once a month.

On many of the questions in the survey respondents may answer “don’t know.” The proportion of respondents giving this reply is shown in the full set of responses included in Appendix A. However, these responses have been removed from the analyses presented in the reports. In other words, the tables and graphs display the responses from respondents who had an opinion about a specific item. When a table for a question that only permitted a single response does not total to exactly 100%, it is due to the common practice of percentages being rounded to the nearest whole number.

Appendix D: Survey Materials

The City of Scottsdale 2020 Community Survey

Please complete this survey if you are the adult (age 18 or older) in the household who most recently had a birthday (the year of birth does not matter). Your responses are anonymous and will be reported in group form only.

1. Please rate each of the following aspects of quality of life in Scottsdale.

	<u>Excellent</u>	<u>Good</u>	<u>Fair</u>	<u>Poor</u>	<u>Don't know</u>
Scottsdale as a place to live.....	1	2	3	4	5
Your neighborhood as a place to live.....	1	2	3	4	5
Scottsdale as a place to raise children.....	1	2	3	4	5
Scottsdale as a place to work.....	1	2	3	4	5
Scottsdale as a place to visit.....	1	2	3	4	5
Scottsdale as a place to retire.....	1	2	3	4	5
The overall quality of life in Scottsdale.....	1	2	3	4	5
Sense of community.....	1	2	3	4	5

2. Please rate each of the following characteristics as they relate to Scottsdale as a whole.

	<u>Excellent</u>	<u>Good</u>	<u>Fair</u>	<u>Poor</u>	<u>Don't know</u>
Overall economic health of Scottsdale.....	1	2	3	4	5
Overall quality of the transportation system (auto, bicycle, foot, bus) in Scottsdale.....	1	2	3	4	5
Overall design or layout of Scottsdale's residential and commercial areas (e.g., homes, buildings, streets, parks, etc.).....	1	2	3	4	5
Overall quality of the utility infrastructure in Scottsdale (water, sewer, storm water, electric/gas).....	1	2	3	4	5
Overall feeling of safety in Scottsdale.....	1	2	3	4	5
Overall quality of natural environment in Scottsdale.....	1	2	3	4	5
Overall quality of parks and recreation opportunities.....	1	2	3	4	5
Overall health and wellness opportunities in Scottsdale.....	1	2	3	4	5
Overall opportunities for education, culture and the arts.....	1	2	3	4	5
Residents' connection and engagement with their community.....	1	2	3	4	5

3. Please indicate how likely or unlikely you are to do each of the following.

	<u>Very likely</u>	<u>Somewhat likely</u>	<u>Somewhat unlikely</u>	<u>Very unlikely</u>	<u>Don't know</u>
Recommend living in Scottsdale to someone who asks.....	1	2	3	4	5
Remain in Scottsdale for the next five years.....	1	2	3	4	5

4. Please rate how safe or unsafe you feel:

	<u>Very safe</u>	<u>Somewhat safe</u>	<u>Neither safe nor unsafe</u>	<u>Somewhat unsafe</u>	<u>Very unsafe</u>	<u>Don't know</u>
In your neighborhood during the day.....	1	2	3	4	5	6
In Scottsdale's downtown/commercial area during the day.....	1	2	3	4	5	6
From property crime.....	1	2	3	4	5	6
From violent crime.....	1	2	3	4	5	6
From fire, flood or other natural disaster.....	1	2	3	4	5	6

5. Please rate the job you feel the Scottsdale community does at each of the following.

	<u>Excellent</u>	<u>Good</u>	<u>Fair</u>	<u>Poor</u>	<u>Don't know</u>
Making all residents feel welcome.....	1	2	3	4	5
Attracting people from diverse backgrounds.....	1	2	3	4	5
Valuing/respecting residents from diverse backgrounds.....	1	2	3	4	5
Taking care of vulnerable residents (elderly, disabled, homeless, etc.).....	1	2	3	4	5

6. Please rate each of the following characteristics as they relate to Scottsdale as a whole.

	<u>Excellent</u>	<u>Good</u>	<u>Fair</u>	<u>Poor</u>	<u>Don't know</u>
Overall quality of business and service establishments in Scottsdale.....	1	2	3	4	5
Variety of business and service establishments in Scottsdale.....	1	2	3	4	5
Vibrancy of downtown/commercial area.....	1	2	3	4	5
Employment opportunities.....	1	2	3	4	5
Shopping opportunities.....	1	2	3	4	5
Cost of living in Scottsdale.....	1	2	3	4	5
Overall image or reputation of Scottsdale.....	1	2	3	4	5

7. Please rate each of the following characteristics as they relate to Scottsdale as a whole.

	<u>Excellent</u>	<u>Good</u>	<u>Fair</u>	<u>Poor</u>	<u>Don't know</u>
Traffic flow on major streets.....	1	2	3	4	5
Ease of public parking.....	1	2	3	4	5
Ease of travel by car in Scottsdale.....	1	2	3	4	5
Ease of travel by public transportation in Scottsdale.....	1	2	3	4	5
Ease of travel by bicycle in Scottsdale.....	1	2	3	4	5
Ease of walking in Scottsdale.....	1	2	3	4	5
Well-planned residential growth.....	1	2	3	4	5
Well-planned commercial growth.....	1	2	3	4	5
Well-designed neighborhoods.....	1	2	3	4	5
Preservation of the historical or cultural character of the community.....	1	2	3	4	5
Public places where people want to spend time.....	1	2	3	4	5
Variety of housing options.....	1	2	3	4	5
Availability of affordable quality housing.....	1	2	3	4	5
Overall quality of new development in Scottsdale.....	1	2	3	4	5
Overall appearance of Scottsdale.....	1	2	3	4	5
Cleanliness of Scottsdale.....	1	2	3	4	5
Water resources (beaches, lakes, ponds, riverways, etc.).....	1	2	3	4	5
Air quality.....	1	2	3	4	5
Availability of paths and walking trails.....	1	2	3	4	5
Fitness opportunities (including exercise classes and paths or trails, etc.)... ..	1	2	3	4	5
Recreational opportunities.....	1	2	3	4	5
Availability of affordable quality food.....	1	2	3	4	5
Availability of affordable quality health care.....	1	2	3	4	5
Availability of preventive health services.....	1	2	3	4	5
Availability of affordable quality mental health care.....	1	2	3	4	5
Opportunities to attend cultural/arts/music activities.....	1	2	3	4	5
Community support for the arts.....	1	2	3	4	5
Availability of affordable quality childcare/preschool.....	1	2	3	4	5
K-12 education.....	1	2	3	4	5
Adult educational opportunities.....	1	2	3	4	5
Sense of civic/community pride.....	1	2	3	4	5
Neighborliness of residents in Scottsdale.....	1	2	3	4	5
Opportunities to participate in social events and activities.....	1	2	3	4	5
Opportunities to attend special events and festivals.....	1	2	3	4	5
Opportunities to volunteer.....	1	2	3	4	5
Opportunities to participate in community matters.....	1	2	3	4	5
Openness and acceptance of the community toward people of diverse backgrounds.....	1	2	3	4	5

8. Please indicate whether or not you have done each of the following in the last 12 months.

	<u>No</u>	<u>Yes</u>
Contacted the City of Scottsdale (in-person, phone, email or web) for help or information.....	1	2
Contacted Scottsdale elected officials (in-person, phone, email or web) to express your opinion.....	1	2
Attended a local public meeting (of local elected officials like City Council or County Commissioners, advisory boards, town halls, HOA, neighborhood watch, etc.).....	1	2
Watched (online or on television) a local public meeting.....	1	2
Volunteered your time to some group/activity in Scottsdale.....	1	2
Campaigned or advocated for a local issue, cause or candidate.....	1	2
Voted in your most recent local election.....	1	2
Used bus, rail, subway or other public transportation instead of driving.....	1	2
Carpooled with other adults or children instead of driving alone.....	1	2
Walked or biked instead of driving.....	1	2

The City of Scottsdale 2020 Community Survey

9. Please rate the quality of each of the following services in Scottsdale.

	<u>Excellent</u>	<u>Good</u>	<u>Fair</u>	<u>Poor</u>	<u>Don't know</u>
Public information services	1	2	3	4	5
Economic development.....	1	2	3	4	5
Traffic enforcement.....	1	2	3	4	5
Traffic signal timing.....	1	2	3	4	5
Street repair.....	1	2	3	4	5
Street cleaning.....	1	2	3	4	5
Street lighting.....	1	2	3	4	5
Sidewalk maintenance.....	1	2	3	4	5
Bus or transit services.....	1	2	3	4	5
Land use, planning, and zoning.....	1	2	3	4	5
Code enforcement (weeds, abandoned buildings, etc.)	1	2	3	4	5
Affordable high-speed internet access.....	1	2	3	4	5
Garbage collection.....	1	2	3	4	5
Drinking water.....	1	2	3	4	5
Sewer services.....	1	2	3	4	5
Storm water management (storm drainage, dams, levees, etc.)	1	2	3	4	5
Power (electric and/or gas) utility.....	1	2	3	4	5
Utility billing.....	1	2	3	4	5
Police services.....	1	2	3	4	5
Crime prevention.....	1	2	3	4	5
Animal control.....	1	2	3	4	5
Ambulance or emergency medical services.....	1	2	3	4	5
Fire services.....	1	2	3	4	5
Fire prevention and education.....	1	2	3	4	5
Emergency preparedness (services that prepare the community for natural disasters or other emergency situations)	1	2	3	4	5
Preservation of natural areas (open space, farmlands and greenbelts)	1	2	3	4	5
Scottsdale open space.....	1	2	3	4	5
Recycling.....	1	2	3	4	5
Yard waste pick-up.....	1	2	3	4	5
City parks.....	1	2	3	4	5
Recreation programs or classes.....	1	2	3	4	5
Recreation centers or facilities.....	1	2	3	4	5
Health services.....	1	2	3	4	5
Public library services.....	1	2	3	4	5
Overall customer service by Scottsdale employees (police, receptionists, planners, etc.)	1	2	3	4	5

10. Please rate the following categories of Scottsdale government performance.

	<u>Excellent</u>	<u>Good</u>	<u>Fair</u>	<u>Poor</u>	<u>Don't know</u>
The value of services for the taxes paid to Scottsdale.....	1	2	3	4	5
The overall direction that Scottsdale is taking.....	1	2	3	4	5
The job Scottsdale government does at welcoming resident involvement.....	1	2	3	4	5
Overall confidence in Scottsdale government.....	1	2	3	4	5
Generally acting in the best interest of the community.....	1	2	3	4	5
Being honest.....	1	2	3	4	5
Being open and transparent to the public.....	1	2	3	4	5
Informing residents about issues facing the community.....	1	2	3	4	5
Treating all residents fairly.....	1	2	3	4	5
Treating residents with respect.....	1	2	3	4	5
Law enforcement treating all residents fairly.....	1	2	3	4	5

11. Overall, how would you rate the quality of the services provided by each of the following?

	<u>Excellent</u>	<u>Good</u>	<u>Fair</u>	<u>Poor</u>	<u>Don't know</u>
The City of Scottsdale	1	2	3	4	5
The Federal Government	1	2	3	4	5

12. Please rate how important, if at all, you think it is for the Scottsdale community to focus on each of the following in the coming two years.

	<u>Essential</u>	<u>Very important</u>	<u>Somewhat important</u>	<u>Not at all important</u>
Overall economic health of Scottsdale.....	1	2	3	4
Overall quality of the transportation system (auto, bicycle, foot, bus) in Scottsdale.....	1	2	3	4
Overall design or layout of Scottsdale's residential and commercial areas (e.g., homes, buildings, streets, parks, etc.)	1	2	3	4
Overall quality of the utility infrastructure in Scottsdale (water, sewer, storm water, electric/gas)	1	2	3	4
Overall feeling of safety in Scottsdale.....	1	2	3	4
Overall quality of natural environment in Scottsdale.....	1	2	3	4
Overall quality of parks and recreation opportunities.....	1	2	3	4
Overall health and wellness opportunities in Scottsdale.....	1	2	3	4
Overall opportunities for education, culture and the arts.....	1	2	3	4
Residents' connection and engagement with their community	1	2	3	4

13. We know the COVID-19 pandemic is challenging in many ways. Please rate how much of a problem, if at all, the following are for your household CURRENTLY.

	<u>Major problem</u>	<u>Moderate problem</u>	<u>Minor problem</u>	<u>Not a problem</u>	<u>Don't know</u>
Household member(s) have COVID-19 or COVID symptoms.....	1	2	3	4	5
Access to medical services.....	1	2	3	4	5
A shortage of food.....	1	2	3	4	5
A shortage of sanitation and cleaning supplies.....	1	2	3	4	5
Loss of employment income.....	1	2	3	4	5
Trouble paying for food or housing.....	1	2	3	4	5
Not being able to exercise.....	1	2	3	4	5
Feeling alone/isolated, not being able to socialize with people....	1	2	3	4	5
Feeling nervous, anxious or on edge	1	2	3	4	5
Not knowing when pandemic will end/not feeling in control	1	2	3	4	5
Household members not getting along	1	2	3	4	5
Lack of technology to perform online work.....	1	2	3	4	5
Lack of technology to perform online schooling	1	2	3	4	5
Helping my children with online schooling.....	1	2	3	4	5
Lack of skills to use technology to communicate	1	2	3	4	5
Providing financial, emotional, or other support to extended family not living with you.....	1	2	3	4	5
Lack of child care/supervision	1	2	3	4	5

14. Please indicate if each of the following is a major source, minor source or not a source of information for you about the City of Scottsdale and its activities

	<u>Major source</u>	<u>Minor source</u>	<u>Not a source</u>
Scottsdale Update utility bill newsletter.....	1	2	3
Scottsdale Life (Parks, Recreation, Library and Human Services newsletter)	1	2	3
City website (ScottsdaleAZ.gov).....	1	2	3
Scottsdale Update weekly email newsletter (or other City email newsletters)..	1	2	3
City Cable Channel 11 or Scottsdale Video Network	1	2	3
Local newspapers, television or radio news	1	2	3
Social media (e.g., Facebook, Twitter, Nextdoor, You Tube, etc.)	1	2	3
Word of mouth.....	1	2	3

The City of Scottsdale 2020 Community Survey

Our last questions are about you and your household.
Again, all of your responses to this survey are completely anonymous and will be reported in group form only.

D1. In general, how many times do you:

	Several times a day	Once a day	A few times a week	Every few weeks	Less often or never	Don't know
Access the internet from your home using a computer, laptop or tablet computer	1	2	3	4	5	6
Access the internet from your cell phone.....	1	2	3	4	5	6
Visit social media sites such as Facebook, Twitter, WhatsApp, etc.	1	2	3	4	5	6
Use or check email.....	1	2	3	4	5	6
Share your opinions online	1	2	3	4	5	6
Shop online.....	1	2	3	4	5	6

D2. Would you say that in general your health is:

- Excellent
 Very good
 Good
 Fair
 Poor

D3. What impact, if any, do you think the economy will have on your family income in the next 6 months?

Do you think the impact will be:

- Very positive
 Somewhat positive
 Neutral
 Somewhat negative
 Very negative

D4. How many years have you lived in Scottsdale?

- Less than 2 years
 2-5 years
 6-10 years
 11-20 years
 More than 20 years

D5. Which best describes the building you live in?

- One family house detached from any other houses
 Building with two or more homes (duplex, townhome, apartment or condominium)
 Mobile home
 Other

D6. Do you rent or own your home?

- Rent
 Own

D7. About how much is your monthly housing cost for the place you live (including rent, mortgage payment, property tax, property insurance and homeowners' association (HOA) fees)?

- Less than \$500 \$2,000 to \$2,499
 \$500 to \$999 \$2,500 to \$2,999
 \$1,000 to \$1,499 \$3,000 to \$3,499
 \$1,500 to \$1,999 \$3,500 or more

D8. Do any children 17 or under live in your household?

- No Yes

D9. Are you or any other members of your household aged 65 or older?

- No Yes

D10. How much do you anticipate your household's total income before taxes will be for the current year? (Please include in your total income money from all sources for all persons living in your household.)

- Less than \$25,000 \$75,000 to \$99,999
 \$25,000 to \$49,999 \$100,000 to \$149,999
 \$50,000 to \$74,999 \$150,000 or more

D11. Are you Spanish, Hispanic or Latino?

- No, not Spanish, Hispanic or Latino
 Yes, I consider myself to be Spanish, Hispanic or Latino

D12. What is your race? (Mark one or more races to indicate what race you consider yourself to be.)

- American Indian or Alaskan Native
 Asian, Asian Indian or Pacific Islander
 Black or African American
 White
 Other

D13. In which category is your age?

- 18-24 years 55-64 years
 25-34 years 65-74 years
 35-44 years 75 years or older
 45-54 years

D14. What is your gender?

- Female
 Male
 Identify in another way
